

An aerial photograph showing a cityscape in the background and a large industrial or construction site in the foreground. The site includes several buildings, a large open area with piles of material, and a road. A blue diagonal overlay covers the left side of the image.

# **DENALI**

# **SERVICES FOR MUNICIPALITIES**

# Consider all the discarded organic material generated within your area.

Beyond the biosolids in the wastewater from your municipal sewer system, you also have discarded grass and tree trimmings from private lawns and public parks. You have unsold fruits and vegetables and packaged foods in your grocery and convenience stores. There's also the used cooking oil and uneaten food from your local restaurants. And that is just scratching the surface.

Much — if not all — of that organic material could end up in your local landfill, potentially causing it to reach capacity at an accelerated rate. But those materials don't have to go to a landfill. In fact, grass clippings, tree trimmings, unsold produce and much more can be put to good use and directly benefit your citizens.

# SOLUTIONS FOR YOUR MUNICIPALITY

Partnering with Denali, the nation's leading full-service organic recycling/repurposing company, to create a comprehensive recycling program for your biodegradable material provides several key benefits\* for municipal governments, including:

Extending the life of your current landfill

Demonstrating sustainable stewardship of organic materials to your citizens

Producing compost, mulch and soil that can be used in city parks and private lawns/gardens

Making playground-safe materials for your parks and schools

Refining biodiesel for use in municipal equipment\*

Creating animal feed for area farms and ranches

Creating organic fertilizer for local farmers or for reclaiming nearby mine lands

\*Some municipal services are only available in specified geographic areas.

# SOLUTIONS FOR YOUR MUNICIPALITY

We provide collection and recycling services through our own facilities, or we can help you design, build and operate a full municipal composting and recycling operation.

## OUR SOLUTIONS INCLUDE:

**Biosolid Management,** including collection, processing and land application

**Permitting, Reporting, Recordkeeping** and overall Residual Management for municipal solid waste programs

**Mobile Dewatering Solutions,** including water removal and water drainage

**Lagoon and Digester Cleaning** to handle cleanouts, closeouts and maintenance of lagoons, basins, digester tanks, storage tanks, holding tanks, ponds and water tanks

**Food Waste Management** to divert unused food items from landfills and create animal feed, compost/ mulch/soil and energy products

## WE OFFER SERVICES SPECIFICALLY DESIGNED FOR:

Municipalities

Food Manufacturers/  
Processors

Grocers

Restaurants

Industrial Kitchens

Hotels

Breweries

Wineries

Schools

Entertainment Venues

## WHY DENALI?

With operations in the 48 contiguous United States plus Puerto Rico, we can easily service your municipality or help you design and operate your organic recycling facility as efficiently and cost-effectively as possible.

We take our role as environmental stewards seriously with regard to recycling organic material and converting it into valuable end products. Regardless of the path the recyclables take — feed, fuel or fertilizer — we ensure it is managed to the highest standards, in compliance with all regulations, and is a quality product that is beneficial to your citizens and the environment.

In 2022, Denali recycled/repurposed **3.7 million pounds of organic material per day** — that's the equivalent of filling the Statue of Liberty **8 times.**

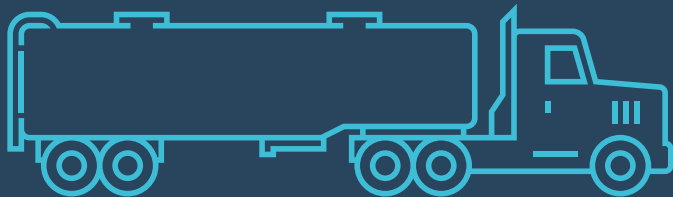

## WHY DENALI?

### BY THE NUMBERS

---

**1,000** trucks

**24** compost, mulch & soil facilities

**53**

compost partners

---

**11**

anaerobic digester partners

**38** 

processing facilities in 14 states

---

**5**  

animal feed manufacturing sites

---

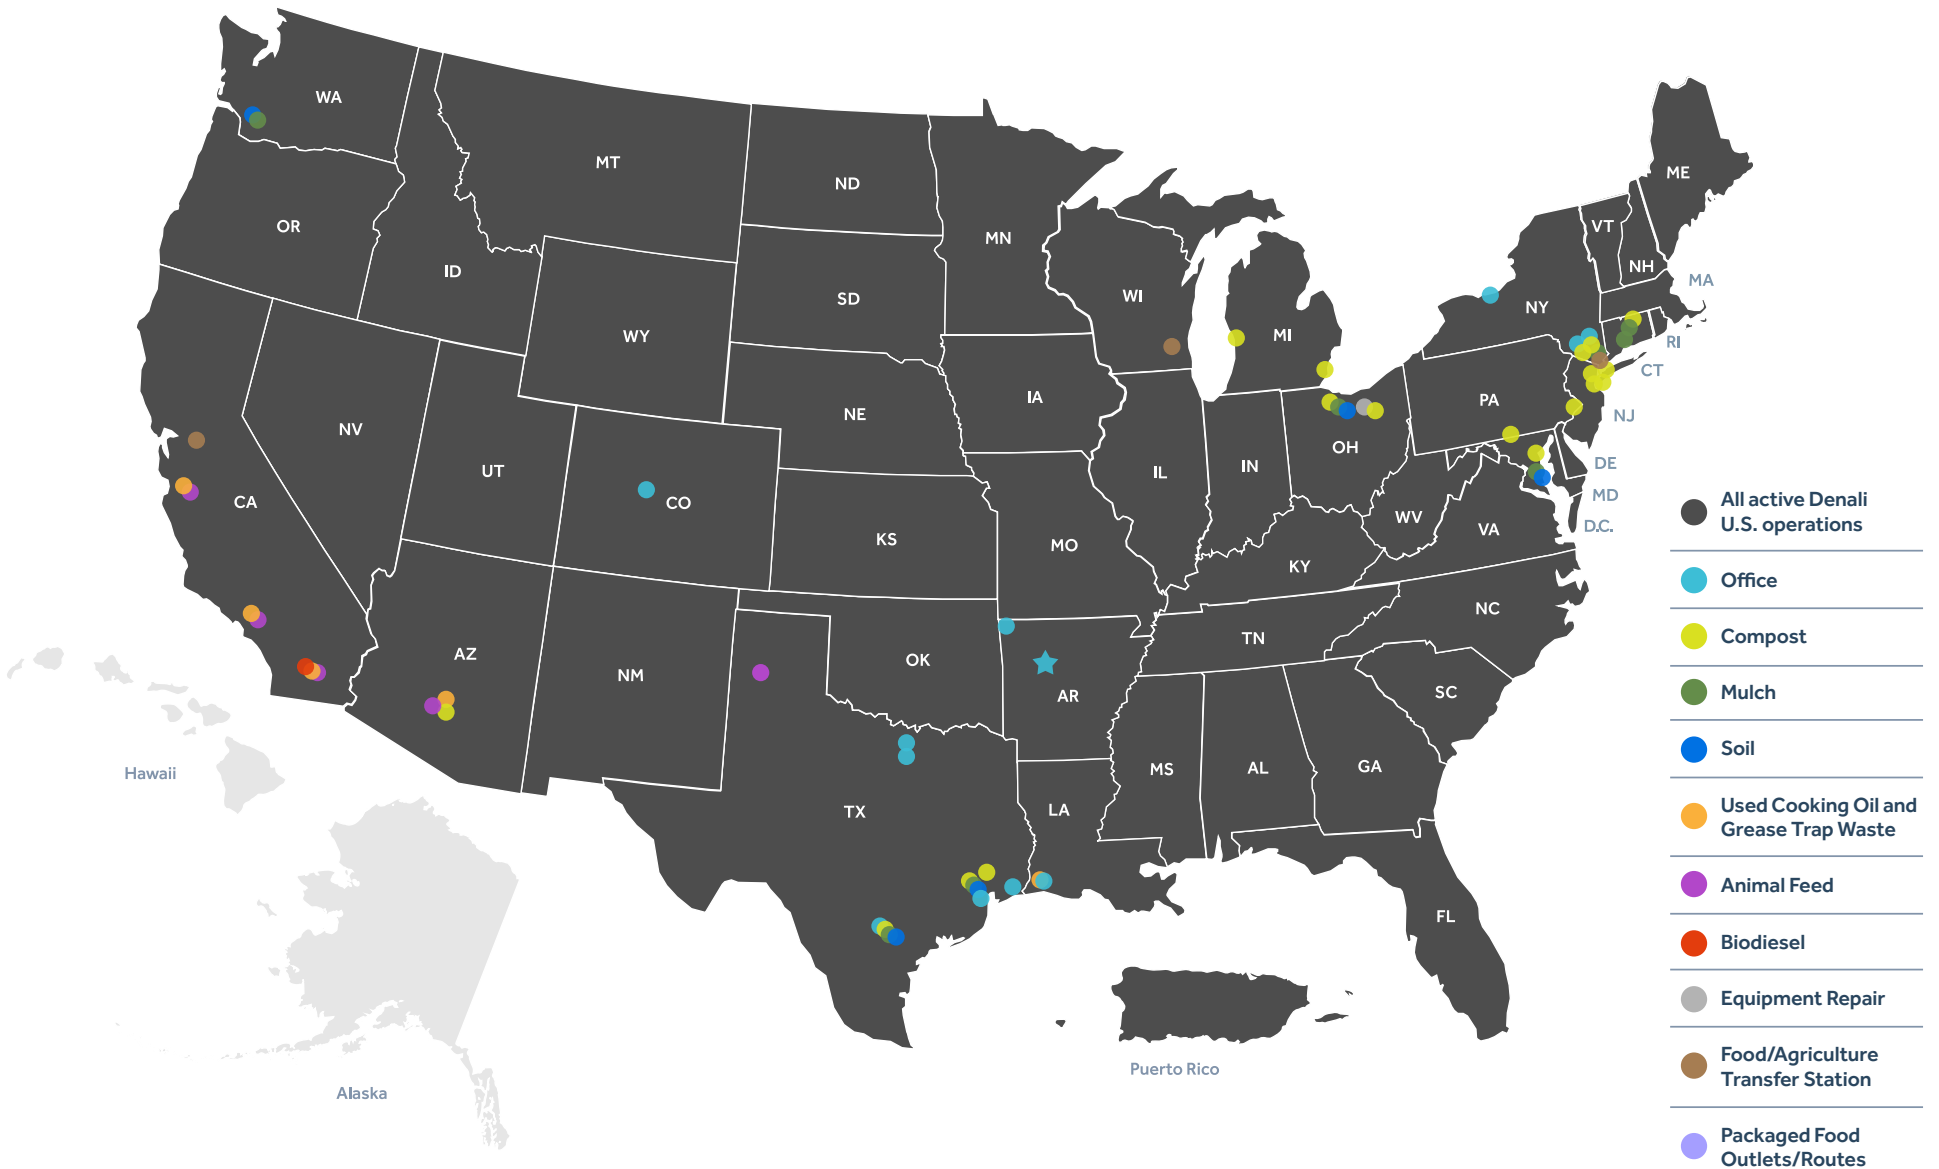

**235** 

farms for animal feed
