

**DENALI**

**HOTELS &  
HOSPITALITY**

The hotel and hospitality industries have big goals for sustainability, and many are trying to cut food waste by 50%. Denali can help achieve zero food waste and 100% food waste diversion for your company.

Denali shares your dreams for the planet, and we've built a best-in-class network to make it happen.

As the nation's leading organics recycler, we take food and green waste and turn it into industrial and commercial products, feeding the circular economy and helping achieve your sustainability goals.

# ZERO-FOOD-WASTE EVENTS

Sustainability is central to today's business landscape. Denali is excited to assist your hotel in achieving your sustainability goals by providing Zero-food-waste events.

Zero-food-waste events come with just a small upcharge and offer the same benefits as a regular hotel conference meeting, along with zero-food-waste solutions.

Benefits for customers include redirecting food waste into the circular economy, obtaining a sustainability certificate, data to include in their ESG metrics and the satisfaction of knowing they are making the right choice.

Benefits for your hotel include differentiation from other venues by offering more sustainable events, data that you can review to improve food waste impact and internal promotion at an event that results in zero food waste.

## A WIN-WIN SOLUTION

Zero-food-waste events create a mutually beneficial situation for all involved parties, offering the opportunity for each organization to contribute positively to the environment while also benefiting themselves.

## HOW IT WORKS: BACK OF RESTAURANT COLLECTION

- 3-yard locked/sealed container(s) are located on the hotel property
- Bins are locked at all times to prevent contamination and outside dumping
- Managers will have keys to access the bins
- Store personnel transfer material to bins at set times for efficiency
- Does not intrude on internal space; diversion process similar to current disposal operations
- Denali services the bins on a weekly schedule in rear of the property
- Denali recycles the material according to the EPA's hierarchy
- Training video/department signage provided. Restaurant visits and check-ins are conducted throughout all phases of program

## STREAMLINED PROCESS

Mechanical depackaging technology offers streamlined waste management solutions tailored for hotels:

- Automated removal of food waste packaging reducing manual labor.
- Simplified recycling processes, cutting down on trash costs.
- Expanded recycling capabilities, including meat products.

These services enhance operational efficiency and sustainability within the hotel/hospitality sector.

## WHY DENALI?

With operations in the 48 contiguous United States plus Puerto Rico, we can easily service your hotel with reliable food waste collection.

We take our role as environmental stewards seriously with regard to recycling waste and converting it into valuable end products. Regardless of the path the organic waste takes — feed, fertilizer or fuel — we ensure it is managed to the highest standards, in compliance with all regulations.

In 2023, Denali recycled/repurposed **38.3 million pounds of organic material per day** — that's the equivalent of filling the Statue of Liberty **83 times.**

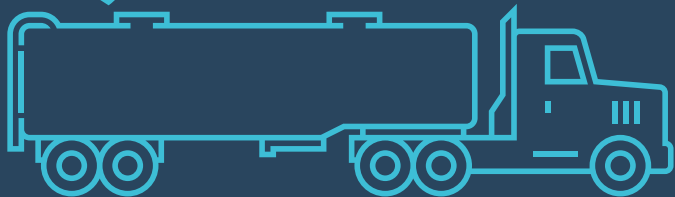

## WHY DENALI?

### BY THE NUMBERS

---

**1,300** trucks

**22** compost, mulch & soil facilities

**79**

composters

---

**13**

anaerobic digester partners

**29** 

processing facilities in 11 states

---

**5**  

animal feed manufacturing sites

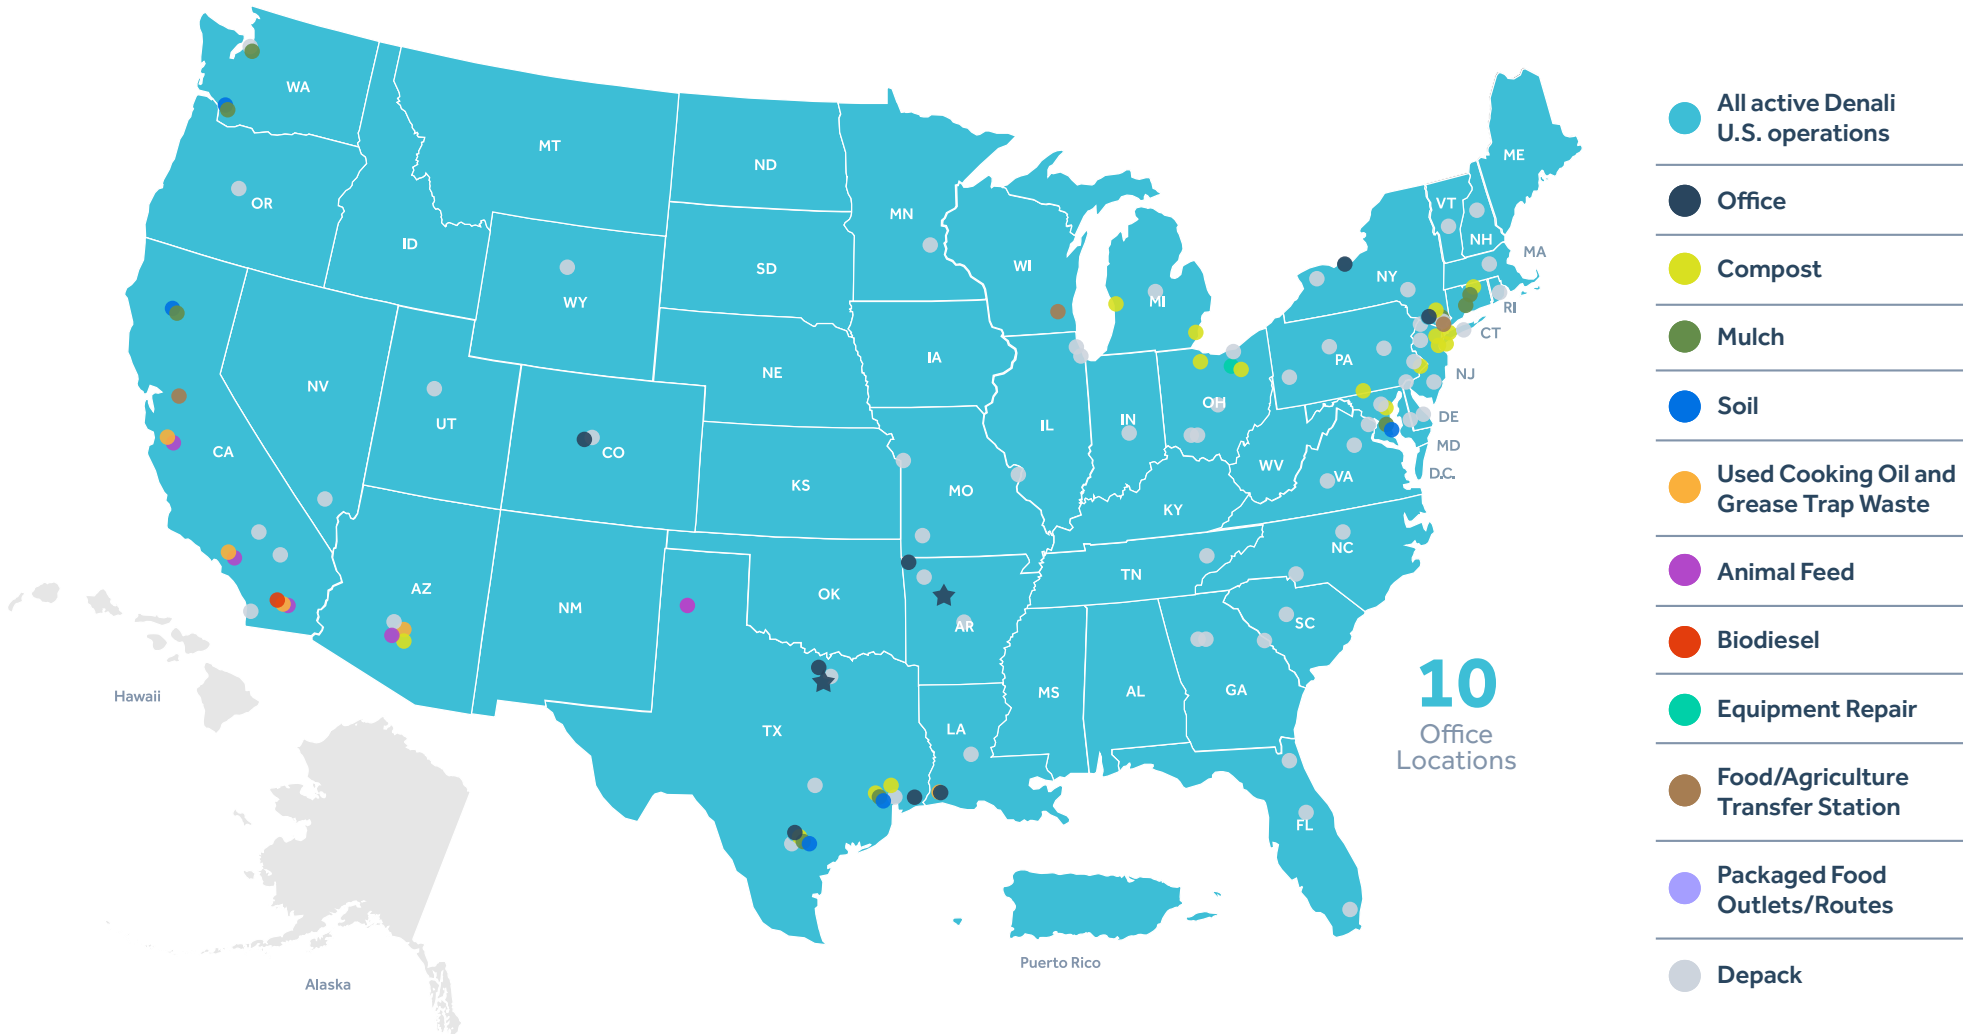

---

**179** 

farms for animal feed
