

Engineered Soils

From basic soil mixtures to the most technical engineered soils, we have the expertise to deliver.

With Denali's WeCare Compost® as a base, we are able to develop, blend and deliver custom soil projects prepared specifically for your needs. We will develop the right approach for each project, review specifications, communicate with engineers and architects, and deliver on-time with service you can count on, season after season.

ENGINEERED SOILS

- ▶ General Planting Soils
- ▶ Rain Garden Soils
- ▶ Custom Soil Mixtures
- ▶ Bioretention Soils
- ▶ Erosion Control Soils

From basic soil mixtures to the most technical engineered soils, we have the expertise to deliver.

Custom Blends. Reliable Service. Quality results for every project.

DENALI

Types of WeCare Engineered Soils™

- ✔ **WeCare Bioretention (Basin) Soils:** Blended for various types of stormwater basins.
- ✔ **WeCare Rain Garden Soils:** Designed and blended for proper storm water management and filtration.
- ✔ **WeCare Engineered Soils:** Soils blended to meet individual project specifications, as well as your needs.
- ✔ **WeCare General Planting Soils:** Ideal for many general planting applications and contributes significantly to sustained soil fertility, superior soil structure and porosity.
- ✔ **WeCare Erosion Control Soils:** Custom soils designed to meet erosion and sediment control needs.

Denali has extensive experience creating custom engineered soils for small-, medium-, and large-scale projects.
